TOXINS AND YOUR CHILD'S HEALTH

WHAT ARE THEY?
Chemicals that prevent or slow the spread of fire. They can move out of products and collect in household dust on the floor where your child plays and in the air they breathe. Flame retardants enter our bodies and can effect our health.

FURNITURE
- Furniture with foam cushions made before 2005
- Do your homework many companies offer flame retardant free fruniture

ELECTRONICS
- Most electronics have been treated to protect against fire
- Dust and mop frequently with a moist cloth

BABY PRODUCTS
- Baby products containing foam
- Look for TB117-2013 labeled products which don’t contain flame retardants. Replace or avoid foam baby products when possible

POTENTIAL HEALTH EFFECTS

- HYPERACTIVITY
- FERTILITY
- HORMONES
